

A Shamley Green Matter

Tree Inventory Management, 23 January 2022

SHAMLEY GREEN - INVENTORY OF TREES ON THE COMMONS

For effective management it is essential to have a record of all trees in the inventory and a unique number by which to refer to each one.

The table on the following two pages is a **COMPLETE INVENTORY** of the 69 trees on the commons in Shamley Green village (this does not currently include Lords Hill). Waverley are responsible for survey, reporting and action regarding tree safety. 32 Of these trees are not on the Waverley database and have no Waverley reference number, presumably because some years ago they were not large enough to be considered regarding tree safety, albeit that a number of them have now significantly passed that threshold. All trees have a plastic tag attached with the Shamley Green Tree Inventory number.

The map following the table shows the location of each tree, the table shows reference to the map grid and to the subsidiary names of the parts of the Green.

There is a link to a report on each tree via the Shamley Green Tree Inventory number. For many the report currently just includes the identification data. Click on the link to access the report

These reports will be updated for each tree and hopefully linked to the Waverley reports regarding tree inspections and safety.

The Waverley numbered plastic tags are also attached to those trees; however Waverley have now starting attaching new metal tags with a different number sequence.

Patrick Mannix (Shamley Green Tree Working Group)
